EARL COLE

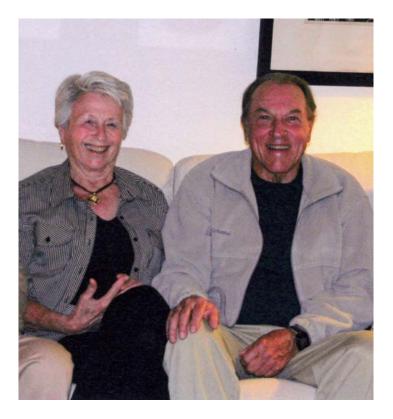

April 7, 2012

I worked at Monsanto from May 5, 1969 till around November 1981 (12-1/2 years).

After leaving Monsanto, I worked at Atari for a couple of years and from there I went to work at Packet Technologies also on Bubb Road. I then bought Joe Straub's business and did subcontract electronic assembly work for 5 years.

After selling my business, I worked at Phase II Industries for 12 years and retired in 2002. We are now living in La Selva Beach (Santa Cruz Co.) where we moved 14 years ago after living in Cupertino for 31 years.

Janet and I have 4 grandchildren and just celebrated our 50th anniversary with a trip to Greece and the islands in the Caspian Sea. We have a small camper and enjoy visiting the national parks all over the US.
